

2024/2025 Academic Session

Semester 1

CMT322 WEB ENGINEERING & TECHNOLOGIES

PART A-REPORT & SIMULATION

A. REPORT DETAILS (5%)

Prepare a project proposal for the given project specification. Your report should be styled in a relevant business proposal format, and include details of the project as follows:

- Introduction to the web application, client and stakeholders of the applications
- Category of the web application
- Web applications modelling
- Prototype design of the web application
- Architecture design of the web application

(Marking rubrics of the report will be given in separate file)

B. SIMULATION DETAILS (7%)

To showcase a working web application, with minimum 4 main functionalities. During face to face simulation, student are expected to showcase important working components of the web applications. Realtime changes to codes and components can be asked during the demonstration.

(Marking rubrics of the simulation will be given in separate file)
